

API Overview

The backend exposes a REST API under the `/api` prefix. Below is a brief outline of the main routes. For the complete specification see `backend/src/docs/swagger.yaml`.

Authentication

`/api/auth`

- `POST /register` - create a new user
- `POST /login` - authenticate and receive tokens
- `POST /refresh` - refresh an access token
- `POST /logout` - clear the refresh token
- `POST /request-reset` - send a password reset OTP (*legacy*)
- `POST /forgot-password` - send a password reset OTP via email
- `POST /verify-otp` - verify the reset code
- `POST /reset-password` - update the password

Users

`/api/users`

- `/categories` - browse and manage categories
- `/tutorials` - public tutorial browsing and admin management
- `/classes` - published classes and enrollment
 - `GET /api/users/classes` - list published classes
 - `GET /api/users/classes/:id` - view details for a published class
 - `POST /api/users/classes/admin` - create a class (instructor or admin)
 - `PUT /api/users/classes/admin/:id` - update a class
 - `DELETE /api/users/classes/admin/:id` - remove a class
 - `GET /api/users/classes/admin/my` - list classes for the logged in instructor
- `/admin` - administrator dashboard features
- `/instructor` - instructor tools
- `/student` - student account endpoints

Booking Management

`/api/bookings/admin` - CRUD operations for session bookings (admin only).

Payment Management

`/api/payments/admin` - CRUD operations for user payments (admin only).

`/api/payments/student`

- `GET /api/payments/student` - list payments for the logged in student
- `GET /api/payments/student/:id` - retrieve a payment belonging to the authenticated student

Community Management

`/api/community/admin` - manage announcements, reports, tags and settings.

Verification

`/api/verify` - send and confirm OTP codes for email or phone verification.

Health Check

GET / - returns a simple message confirming that the API is running.

Offers

/api/offers

- GET /api/offers - list open offers
- POST /api/offers - create a new offer (auth required)
- GET /api/offers/:id - view offer details
- PUT /api/offers/:id - update an existing offer
- DELETE /api/offers/:id - remove an offer
- GET /api/offers/:offerId/responses - list responses for an offer
- POST /api/offers/:offerId/responses - create a response
- GET /api/offers/:offerId/responses/:responseId/messages - list offer messages
- POST /api/offers/:offerId/responses/:responseId/messages - send a message
- DELETE /api/offers/:offerId/responses/:responseId/messages/:messageId - delete a message you sent
