

Book Marketplace Module Workflow

Module Goal

Allow instructors to upload and sell PDF books, and allow students to browse, purchase, and download them. Admin approves books, tracks sales, and configures settings.

Database Schema

books

- id
- title
- short_description
- detailed_description
- price (decimal)
- pdf_url
- cover_image_url
- category_id (FK → categories)
- language
- license_type
- allow_preview
- preview_pages
- instructor_id (FK → users)
- status (pending, approved, rejected)
- created_at

book_purchases

- id
- student_id (FK → users)
- book_id (FK → books)
- price_paid
- purchased_at

book_categories (optional)

- id
- name
- slug
- status

Route Map (Frontend)

Public

- /marketplace/books → Browse books
- /marketplace/books/[id] → Book details

Student

- /cart → View cart
- /payments/checkout → Pay for books
- /dashboard/student/library → Purchased books list (download access)

Instructor

- /dashboard/instructor/books → Book list (own)
- /dashboard/instructor/books/create → Add new book

- `/dashboard/instructor/books/[id]/edit` → Edit book
- `/dashboard/instructor/books/analytics` → Sales overview

Admin

- `/dashboard/admin/books` → View all books
- `/dashboard/admin/books/pending` → Approve/reject
- `/dashboard/admin/settings/books` → Commission %, file rules
- `/dashboard/admin/books/analytics` → Sales statistics

API Endpoints (Backend)

Instructor

- `POST /api/books` → Create new book
- `PUT /api/books/:id` → Update book
- `GET /api/instructor/books` → List instructor's books
- `GET /api/instructor/books/analytics` → View sales

Student

- `GET /api/books` → Public book list
- `GET /api/books/:id` → Book details
- `POST /api/cart` → Add to cart
- `POST /api/checkout` → Process purchase
- `GET /api/library` → List purchased books
- `GET /api/library/download/:bookId` → Download secure PDF

Admin

- `GET /api/admin/books/pending` → Pending list
- `PATCH /api/admin/books/:id/approve` → Approve book
- `PATCH /api/admin/books/:id/reject` → Reject book
- `GET /api/admin/books/analytics` → View stats

Components

- `<BookCard />` - Title, price, instructor, thumbnail
- `<BookForm />` - Form to create/edit book
- `<BookDetails />` - Full view + “Add to Cart” button
- `<CartItem />` - Book row in cart with quantity controls
- `<LibraryItem />` - Book row in student library
- `<SecureDownload />` - Button for PDF access (with auth token check)
- `<AdminBookRow />` - Approve/reject actions

Permission Flow

Action	Role
Upload book	Instructor only
Approve/reject	Admin only
Purchase book	Student only
View library	Student only
Download book	Student only (if purchased) and plan feature <code>books_download</code> enabled
View earnings	Instructor

Payment & Access Flow

1. Student adds book to cart
2. Proceeds to checkout
3. After successful payment:
 - `book_purchases` entry is created
 - PDF is added to My Library
 - Student can access book via secure download route

Notifications (optional enhancements)

- Instructor notified when book is approved
- Instructor notified on each new sale
- Admin notified on new book submission
- Student gets confirmation email after purchase

Admin Configuration

- Commission percentage (20% default)
- Max PDF size (e.g., 50MB)
- Toggle book module on/off
- Book categories manager (optional)
