

# Release Checklist

Use this checklist to verify the repository is clean before creating a release package.

- ☐ Run `git status` to ensure no uncommitted changes remain.
- ☐ Remove any chat transcripts or temporary notes.
- ☐ Delete empty `project-structure*.txt` files.
- ☐ Ensure every `package-lock.json` has a corresponding `package.json` in the same directory.
- ☐ Confirm `node_modules` directories and build artifacts are not committed.
- ☐ Run backend tests with `npm test` from the `backend` directory.
- ☐ Run frontend tests with `npm test` from the `frontend` directory.
- ☐ Review documentation for accuracy and completeness.
- ☐ Verify the application builds successfully.

Following this checklist helps keep release packages lean and reliable.
